X10D INTL RELEASE NOTES

NEW

Geofence

Set the range limits that your Skydio X10D may operate from the controller. By enabling this feature, the drone will be prevented from flying beyond the maximum set range.

Select the Flight Controls menu and the Limits tab, toggle on Range Limit, and set the range from 500 to 10,000 meters. You will be alerted when you reach the geofence boundary.
