QUANTUM SYSTEMS

Dear Partner,

we always strive to let our customers benefit from the newest soft- and hardware improvements. Therefore, we would like to inform you that there is a new release coming today, April 26 2024.

We recommend updating all Skynode Vectors and Scorpions with this safety-relevant update as soon as possible. The update will include a new QOS firmware version for all Skynode models.

Vector and Scorpion Skynode | Autopilot QOS | 2.5.2.27

General

- Reduction of climb speed in autostart phase to reduce likelihood of ESC false commutations
- Robustified blocked propeller detector
- Faster restart after blocked propeller detection

Bugfix

- Allow switch to home landing point under any conditions when a mission without remote landing point is uploaded in flight

The highest level of flight safety can only be achieved with the latest software release. Therefore, Quantum-Systems can only offer warranty if the UAV and QBase are up to date as soon as an update becomes available. If you have any questions please contact the Quantum-Systems support.

Happy Landings
your Quantum-Systems Support Team
