About TrellisWare

TrellisWare was founded in 2000 by four innovators in the areas of signal processing and advanced communications. The co-founders spun-off the company from ViaSat, Inc. to pursue terrestrial applications of technology that combined foundations in signal processing innovation with the ability to productize these ideas for the real-world in the commercial sector. TrellisWare is a worldwide leader in highly advanced algorithms, waveforms, and communications systems that range from small form factor radio products to fully integrated solutions.

TrellisWare's technology facilitates mission critical voice and data delivery in the most severe conditions. The result is an exceptionally robust, flat network that provides unprecedented scalability and supports hundreds of nodes while using less spectrum than any other Mobile Ad Hoc Networking (MANET) technology. The TrellisWare TSM™ waveform is incorporated into a wide range of systems, including TrellisWare® radios and trusted industry partner radios, as well as multiple government and commercial solutions. TrellisWare's next-generation Katana™ waveform is the newest resilient narrowband waveform designed to operate in highly contested radio frequency (RF) communication environments.

TrellisWare transforms cutting-edge theory to practice, exploring the boundaries of time, frequency and space through advanced architectures, sophisticated processing, efficient protocols, and real-time environmental awareness to create powerful wireless networks. These include Software Defined Heterogeneous Networking (SOHN), Cognitive Networking, Distributed Signal Processing, and Dynamic Spectrum Access, to name a few.

TrellisWare Waveforms

TrellisWare Technologies is the industry leader in the development and deployment of Mobile Ad Hoc Networks (MANET) with the TSM and Katana waveforms. TrellisWare's TSM waveform is a highly scalable and robust MANET waveform that was designed from the ground up to support over 800 nodes with simultaneous voice, data, video, and Position Location Information (PLI) operating in a single radio frequency channel. TrellisWare's Katana waveform combines resilient narrowband fast frequency hopping with tactical MANET, operating in highly contested radio frequency (RF) communication environments.

TSM

The TSM waveform is used worldwide in highly challenging tactical environments, supporting military, commercial, and public safety missions.

Unlike many competing commercial MANET solutions that overlay Internet-driven routing protocols over commercial technologies such as Wi-Fi (802.11n), TSM is a true Software Defined Radio (SDR) waveform that includes all network layers and is offered in different variants to support various mission profiles. It has been ported to many third-party SDR products, including eight Program of Record (POR) tactical radios for the US military.

The TSM waveform offers robust, reliable communications with simplified network management, and has been validated in real, critical missions with diverse use cases ranging from Intelligence, Surveillance & Reconnaissance (ISR) to Command & Control (C2) applications in some of the most challenging environments.

Katana

The Katana waveform is a Software Defined Radio (SDR)-based solution that facilitates communications in near-peer threat environments and provides broad spectrum allocation options for global deployment. Used together with TrellisWare's TSM waveform, the Katana waveform can provide for the Primary, Alternate, Contingency, and Emergency (PACE) capability for operation in both congested and contested environments.

The Katana waveform represents the modernization of resilient long-range narrowband communication while being interoperable with the Warrior Robust Enhanced Networking Narrowband (WREN NB) waveform at the Sensitive But Unclassified (SBU) security level.

Products

Each radio in the TrellisWare family of TSM-enabled products runs with the robust TSM waveform. The TSM Shadow radios are available as full-featured handhelds or in vehicular configurations, while the TSM Ghost radios are small form factor and simplified. Both product lines are Software Defined Radios (SDR) that support a wide frequency range. TSM-enabled products interoperate with each other over the TSM network and are easy to integrate into larger systems for complete coverage, security, and service.

TrellisWare Technologies is proud to provide our emergency management professionals with TSM-enabled radios which are Federal Communications Commission (FCC) Part-15 certified. These certifications provide emergency management organizations the flexibility to operate freely in an unlicensed spectrum. Please review our family of handheld and wearable radios for the latest FCC spectrum supported products, along with approved accessories.

If your agency has further questions regarding TrellisWare's family of radios and capabilities, please reach out to info@trellisware.com.

TW-950 TSM Shadow Radio

Highlights

- Industry-leading size, weight, and power (SWaP) among tactical networking radios
- Supports simultaneous voice talk groups, rapid PLI reporting, Internet Protocol (IP) data, and video streaming all in a compact form factor
- Built-in Multi-Net Bridge (MNB) capability
- Accessory offering enables a wide range of use cases with multiple power options, data interfaces, and audio ancillaries
- FCC/IC-certified configuration available

SPECIFICATIONS

Physical	
Overall Size	4.54 L x 2.76 W x 0.87 D in (115.32 x 70.10 x 22.10 mm)
Weight (R/T only)	11.3 oz (320 g)
Frequency Range	<ul style="list-style-type: none"> • L-UHF: 225–450 MHz • U-UHF: 698–970 MHz • L/S Bands: 1250–2600 MHz
Configurable Bandwidth	1.2, 3.6, 10, 20, 40 MHz
Spectrum Pipelining Bandwidth	20 MHz and 40 MHz
Transmit Power	100mW, 250mW, 500mW, 1W, 2W
Battery Life	8 Hours with 32 Wh Rechargeable Battery
Input Power	3.0 – 4.0 V DC, 31 W max.
Connectors	<ul style="list-style-type: none"> • ODU data/audio, TNC RF, SMA GPS • 36-pin side connector
Data Rate	Pt. to Pt., up to 32 Mbps (1-hop)
Environmental	MIL-STD-810G
Operating Temperature Range	-20°C to +55°C (-4°F to +131°F)
Water Resistant	IP68
IP Support	IPv4, IPv6; Unicast, Multicast, Broadcast; TCP, UDP
Audio Encoding	AMR 5.9, MELPe, AAC Audio
Video Encoding	SD and HD H.264
Net Entry Time	< 1 Second
Waveform	TSM 6, (Katana Optional)

Note: For Military and Public Safety/Security Use. Please contact TrellisWare Customer Support at support@trellisware.com for FCC/IC radio options, or EU and UK declarations.

Networking	
Network Coverage	<ul style="list-style-type: none"> • Mobile Ad Hoc Networking • Multi-hop – Up to 8 Hops • 800 Nodes in a Single RF Channel • Robust in Harsh RF Environments
Communication Services	<ul style="list-style-type: none"> • Simultaneous Voice, Data, and PLI • Up to 32 Voice Talk Groups • Built-in GPS chip AFAIK • IP Support – IPv4, IPv6; Unicast, Multicast, Broadcast; TCP, UDP
Security	<ul style="list-style-type: none"> • AES-256
Application Support	<ul style="list-style-type: none"> • Built-in Web Applications • Over the Air Remote Control • APIs for 3rd Party Integration • PLI with CoT, KML, and JSON • Integration with Android™

Frequency range, Waveform limited for FCC/IC as shown below:

FCC/IC Frequency Range	2400–2483.5 MHz
Waveform	TSM Only
FCC/IC Transmit Power	100mW, 250mW, 500mW, 1W

Specifications subject to change without notice.

TW-135 TSM Shadow High Power Radio (HPR)

Highlights

- Contains all of the features of the TW-950 radio
- Delivers up to 20 watts of transmit power in UHF, L-band, and S-band to extend and strengthen MANET networks
- Versatile form factor that supports vehicular, airborne, fixed-site, or manpack configurations
- Shares common accessories with the TW-900/950 handheld radio to maximize flexibility and save life cycle cost

SPECIFICATIONS

Physical	
Size (R/T Only)	7.98 L x 6.45 W x 3.4 H in (202.69 x 163.83 x 86.36 mm)
(Without Handles)	7.46 L x 5.25 W x 3.4H in (189.48 x 133.35 x 86.36 mm)
Weight (R/T only)	6.40 lbs (181.44 g)
Frequency Range	<ul style="list-style-type: none"> • L-UHF: 225–450 MHz • U-UHF: 698–970 MHz • L/S Bands: 1250–2600 MHz

TW-860 TSM Spirit Radio Options

The TrellisWare TW-860 TSM Spirit Radio is designed to meet the multi-domain needs of today's next-generation soldier systems, public safety, and first responder requirements. The TW-860 TSM Spirit offers customizable solutions and purchase options to meet your specific organizational needs.

Reference the below chart to build out your radio by selecting the options that best meet your needs and budget. Options support both voice and PLI-centric use cases, as well as data-centric use cases.

Contact your TrellisWare Business Development Director or Account Manager for more details.

	TW-860-00X	TW-860-0VX	TW-860-0EX	TW-860-0MX

TW-875 TSM Ghost Radio

Highlights

- Ideal for network relay when a full-featured radio is not required
- Provides USB On The Go (OTG) data interface for IP data, configuration, and network monitoring
- Shares common antennas and cabling with the TW-900/950 handheld radio to maximize flexibility and save life cycle cost
- FCC/IC-certified configuration available

SPECIFICATIONS

Physical	
Overall Size	4.06 L x 2.50 W x 1.46 H in (103.12 x 63.50 x 37.08 mm)
Weight	16 oz (450 g)
Frequency Range	<ul style="list-style-type: none"> • L-UHF: 225–450 MHz • U-UHF: 698–970 MHz • L/S Bands: 1250–2600 MHz
Configurable Bandwidth	1.2, 3.6, 10, 20 MHz
Spectrum Pipelining Bandwidth	20 MHz and 40 MHz
Transmit Power	100mW, 250mW, 500mW, 1W, 2W
Input Power	5 V to 20 V
Connectors	<ul style="list-style-type: none"> • USB On-the-Go • RF TNC • GPS SMA
Data Rate	Pt. to Pt., up to 32 Mbps (1-hop)
Security	<ul style="list-style-type: none"> • Built-in AES-256 COMSEC • TRANSEC
Environmental	MIL-STD-810G
Water Resistant	IP68
Operating Temperature Range	-20°C to +55°C (-4°F to +131°F)
Net Entry Time	< 1 Second
Waveform	TSM 6, (Katana Optional)

Specifications subject to change without notice.

Note: For Military and Public Safety/Security Use. Please contact TrellisWare Customer Support at support@trellisware.com for FCC/IC radio options, or EU and UK declarations.

Networking	
Network Coverage	<ul style="list-style-type: none"> • Mobile Ad Hoc Networking • Multi-hop – Up to 8 Hops • 800 Nodes in a Single RF Channel • Robust in Harsh RF Environments
Communication Services	<ul style="list-style-type: none"> • Relay node for all TSM services (Voice, Data, PLI) • Built-in GPS chip AFAIK • IP Support – IPv4, IPv6; Unicast, Multicast, Broadcast; TCP, UDP
Security	<ul style="list-style-type: none"> • AES-256
Application Support	<ul style="list-style-type: none"> • Built-in Web Applications • Over the Air Remote Control • APIs for 3rd Party Integration • PLI with CoT, KML, and JSON • Integration with Android™ applications

Frequency range, Waveform limited for FCC/IC as shown below:

FCC/IC Frequency Range	2400–2483.5 MHz
Waveform	TSM Only
FCC/IC Transmit Power	100mW, 250mW, 500mW, 1W

TW-870 TSM Ghost Radio

Highlights

- Fully integrated, self-contained radio module for integration into third-party systems with minimal engineering effort
- Accepts outside power, has GPS and RF antenna connectors, and a data interface
- Designed for quick integration into uncrewed systems and other platforms
- Cost-effective option when mission set only requires relay for data transfer and/or network extension
- FCC/IC-certified configuration available
