

### Field-proven stabilized camera for defense, security, and industrial applications.

The Falcon is part of a family of EO/IR sensors, leading in the field of micro-stabilized gimbal cameras. Constantly pushing new technological advancements, we offer a wide range of field-proven stabilized cameras and accessories seamlessly integrated on our Unmanned Aerial Systems.

### About the Falcon EO/IR camera

The Falcon is a dual EO/IR stabilized camera built for long-range observation using high-res day & night vision, featuring an increased IR range and unparalleled X80 zoom.

The lightweight design combined with our modular UAS platforms enables long-endurance & long-range operations with AI software capabilities to enhance real-time intelligence. The Falcon offers advanced image quality to capture detailed imagery, such as license plates and faces, from distances up to 4 kilometers.
